

Guardian Wall-mount Installation

Benefits:

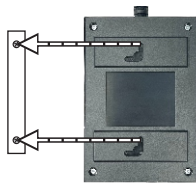

- Clean/Neat Appearance
- Save Space
- Theft Resistance
- Clear View of Power & Fault LED

Tools/hardware needed:

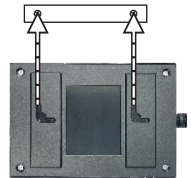

- Screwdriver and/or hammer
- Screws, nails/screw anchors for drywall installation

This unit can be wall-mounted **vertically** or **horizontally**. Use the **template** below to mark where the screws are going to be placed on the wall.

- 1) If installing on drywall, make the holes and insert the anchors into the holes.
- 2) Screw the screws into the anchors. Make sure to leave 1/4" or more unscrewed so the unit can hang using the mounting slots in the back of the unit. Make sure to place the unit where monitoring lights can be observed.

MOUNTING SLOTS

USE THE TEMPLATE BELOW TO MARK WHERE THE SCREWS WILL BE PLACED
